EDUCATION

JAIPUR ENGG. COLLEGE & RESEARCH CENTER, JAIPUR

B.Tech, Computer Science
2013-2017 | Jaipur, IN
Percentage: 70%

K.V. NASIRABAD

12th Science, CBSE
2013 | Ajmer, IN
Percentage: 89%

SKILLS

PROGRAMMING

Javascript • Ruby • Java • Python • PHP

SERVER SIDE

Backend:
Node.js • Express.js • Ruby on Rails
Databases:
MySQL • MongoDB • Redis
Tools:
Kubernetes • Docker

CLIENT SIDE

Web:
React • Redux • Angular (1,2) • RxJS •
Typescript • CSS • SASS
Mobile:
Nativescript • Ionic Framework

FAMILIAR

Go • C++ • Slim Framework • Kafka •
GCP • Illustrator • Linux System
Administration

EXPERIENCE

CLARISIGHTS | Software Engineer
July. 2016 – Present

- Built RESTful web services using Ruby on Rails, Postgres, MongoDB, and Redis. Used RSpec for unit testing.
- Integrated Seznam Marketing API by building a data pipeline to pull data periodically.
- Built realtime collaboration functionality using rails actioncable & websockets.
- Refactored tightly coupled backend and UI code into seperate repos.
- Worked on React, Redux, Redux Saga and Jest to build and test elegant UIs.
- Built highly customizable marketing analytics dashboard v2 from scratch, a rewrite of dashboard v1. Resulting in significant performance gain, cleaner interface and extensible codebase.

CELEBAL | Full Stack Developer, Intern
Nov. 2016 – Feb. 2017

- Built and deployed zeateries, a food delivery application.
- Worked on Golang, CockroachDB on backend to create RESTful web services.
- Worked on Angular2 for web apps and Nativescript for mobile applications.

YOUSTART LABS | Javascript Developer, Intern
May 2016 – July 2016

- Worked on Electron to build a cross-platform examination desktop application.
- Used Node.js, Express.js & MongoDB technologies for backend.

PROJECTS

ATTENDALYTICS | Attendance Management & Analytics
Smart Attendance Register with features like analytics, sorts-filters, multi views & access controls as digital record using PHP, jQuery & Datatables.

NIZICHAT | Anonymous Group Chat Web App
Secret code and socket based web app using Node.js, Socket.io & jQuery.

SNAKE CHASE | 2 Player Snake-Cherry Game
HTML5 Canvas & JS based multiplayer version of traditional snake game.

MOVIEDB | A Complete Movie Database
Web app built using Angular2 on front-end and Grails/Groovy on the backend.

More projects and links are on the Github account and online portfolio.
